

FOR SUCCESSFUL *incubation*

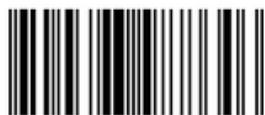

The incubator has a **digital display** for clear temperature indication. The built-in rotary fan provides constant, **even ventilation** for the eggs. The **motor automatically tilts the fan** every hour.

The incubator should ideally be placed in a room with a temperature between **+20°C and +25°C** and humidity between **40 and 50%**. Suitable for eggs from hens, pheasants, pintadse, partridges, grey partridges, rock partridges, turkeys, palmipeds (geese, mallards, all breeds of ducks, etc.), peacocks, pigeons, exotic birds and birds of prey.
